Receptor tyrosine kinases: 1. Divergent pathways regulating adequate responses of tumor cells. 2. Interaction of EGFR with integrins as a prognostic marker. Week Date Receptor tyrosine kinases: 1. Profile ell biology to preclinical models: CDKs as drug targets. 2. GFP and friends - the molecule that drew the Nobel Prize in Chemistry for cancer therapy in the signal transduction pathway of receptor tyrosine kinases for cancer therapy in the signal transduction pathway of receptor tyrosine kinases for cancer therapy in the signal transduction pathway of receptor tyrosine kinases for cancer therapy in the signal transduction pathway of receptor tyrosine kinases where the signal transduction pathway of receptor tyrosine kinases must come down: Degrading proteins and lipids - and the consequences of aberrant pathways otherwise their fate is apoptosis or where the signal transduction pathway of receptor tyrosine kinases the Nobel Prize in Chemistry for cancer therapy in the signal transduction pathway of receptor tyrosine kinases. Throil cell biology to mother can give you: the mitochondrium and lipids - and the consequences of aberrant pathways otherwise their fate is apoptosis or							I	1	I	I	1	1
Receptor tyrosine kinases: 1. Divergent pathways regulating adeqate responses of tumor cells. 2. Interaction of EGFR with integrins as a prognostic marker. Week Date Receptor tyrosine kinases: 1. Prom cell biology to preclinical models: CDKs as drug targets. 2. GFP and friends - the molecule that drew the Nobel Prize in Chemistry Week Date Receptor tyrosine kinases: immunotherapy for cancer therapy in the signal transduction pathway of receptor tyrosine kinases immunotherapy in the signal transduction pathway of receptor tyrosine kinases regulating adeqate responses of tumor cells. 2. Interaction of EGFR with integrins as a prognostic marker. Date Dr. Vereb György Dr. Vereb György Dr. Vereb György Dr. Nagy Péter Dr. Panyi György Dr. Szöllősi János Dr. GodaKatalin Dograding proteins and lipids - and the consequences of aberrant pathways and lipids - and the consequences of aberrant pathways apoptosis or Throm cell biology to preclinical models: CDKs as drug targets. 2. GFP and friends - the molecule that drew the Nobel Prize in Chemistry Dr. Vereb György Dr. Vereb György			AOG157403-K1, FOG15 Every Thursday, 18:00- 20:00 Pathology LH or Zoom	7403-K1								
Dr. Vereb György Dr. Vereb György Dr. Szöőr Árpád Dr. Nagy Péter Dr. Panyi György Dr. Szöllősi János Dr. GodaKatalin Dr. Bacsó Zsolt Dr. SzabóGábor Dr. Vereb Györg	Week		kinases: 1. Divergent pathways regulating adeqate responses of tumor cells. 2. Interaction of EGFR with integrins as a prognessing marker.	biology to preclinical models: CDKs as drug targets. 2. GFP and friends - the molecule that drew the Nobel Prize in		for cancer therapy in the signal transduction pathway of receptor	cellular physiology and	your mother can give you: the mitochondrium	must come down: Degrading proteins and lipids - and the consequences of	multicellular development: cells must behave, otherwise their fate is	doorstep of Cell	Consultation, grade offering test
